

This version of hex code is for use with the Europe version of Microfox. In Europe it is accepted practice for ARDF transmitters to not identify the call sign of the control operator.

This code is not for use in the US where it is an FCC requirement for all transmitters to identify with their control operators callsign.

Note all hex code files in this zip folder was tested on hardware on 2-12-2011 and followed the standard ARDF cycle.

Recommend antenna for Microfox.
